RE: ERO Registry #019-6160 for input on the Proposed Update to the Ontario Wetland Evaluation System

Dear Minister Clark,

Ontario Farmland Trust (OFT) is a not-for-profit organization whose mission is to protect and preserve Ontario farmlands and associated ecological lands through direct land securement, stewardship, policy research, and public education. Our goal is to ensure a safe and sustainable food supply for future generations in this province by protecting farmland in perpetuity.

With growing food insecurity in the province and the world, it is more important than ever before that we protect the finite and non-renewable resource that is our agricultural soil. Ontario's farmland directly supports the agri-food sector, which is the largest economic sector in the province, employing more than 860,000 Ontarians along the supply chain and annually contributing over \$47 billion to the province's GDP¹. In order to preserve the viability of Ontario's agri-food sector, it is crucial that the province's finite supply of agricultural land is protected.

In the past, OFT has commended the Province's commitment to the policies that strengthen agriculture in Ontario. We recognize the need to address issues of housing availability and affordability, however, OFT would like to encourage the Province to continue showing a strong commitment to Ontario's agri-food sector by making policy decisions that protect agricultural systems, agricultural land and food security and support the continued production of local food.

The housing crisis facing Ontario is a real and wide-spread problem, however, OFT is concerned that the provincial policy changes in Bill 23 will not provide an effective solution. If this crisis is not addressed effectively, it will only exacerbate the other challenges Ontarians have to face, such as rising food insecurity, rising land prices, and the destruction of the agricultural system in Ontario.

It is important that wetland complexes are maintained, and that they are reviewed and assessed as a whole. Wetlands within a specific complex are highly interconnected, hence why the term "wetland complex" was created and implemented in provincial land use planning policy in the first place. If one wetland in a complex is altered, it may affect the hydrology of other wetlands within the complex, and as such evaluating wetlands individually rather than as part of a complex may not provide accurate valuation of the ecosystem². For instance, if a wetland that is part of a previously determined complex is developed, due to allowances permitted by re-evaluation, this may alter the hydrology of the complex which could

result in flooding of surrounding areas, such as farmland. Preventing flooding in agricultural areas is key to preventing erosion, and wetland complexes play a key role in this.

As such, OFT recommends that the proposed changes allowing for wetlands within a complex to be re-evaluated individually are removed, and that the term wetland complex is reinstated in the evaluation documents.

Ontario needs an increased housing supply, but what is proposed in Bill 23 is not an effective solution. Ontarians need affordable, high-density housing solutions that provide residents with easy, walkable, access to public transit and amenities³. New development built upon annexed farmland and natural areas are not an equitable solution to the housing crisis, and will only serve to magnify both the climate crisis and food insecurity.

Thank you for this opportunity to share our recommendations and feedback on ERO 019-6160. We sincerely hope you take our suggestions into consideration when reviewing the feedback you receive. If you have any questions or would like to speak further on these issues, please do not hesitate to get in touch. We look forward to continuing to work with the Province to strengthen the agricultural system and protect the viability of the agricultural sector.

Most Sincerely,

Martin Straathof
Executive Director
Ontario Farmland Trust

Bernard Pope
Chair, Board of Directors
Ontario Farmland Trust

Margaret Walton
Chair, Policy and Education Committee
Ontario Farmland Trust
